

NCPE Plain English Summary

Drug name: sacituzumab govitecan (*pronounced SAK-ih-TOO-zoo-mab GOH-vih-TEE-kan*) for the treatment of adult patients with locally advanced or metastatic triple negative breast cancer (TNBC) who have received two or more prior systemic therapies, including at least one of them for advanced disease.

Brand name: Trodelvy®

What is the NCPE?

The National Centre for Pharmacoeconomics (NCPE) is a team of experts who look at the health benefits and costs of medicines. The HSE asks us to advise on whether or not a new medicine is good value for money. We give unbiased advice to help the HSE provide the most effective, safe and cost-effective (value for money) treatments for patients.

How do we make our recommendations?

Our main focus is on the health benefits and cost effectiveness of a medicine. We look at the wider costs and health benefits associated with a new medicine, for example:

- Does the new medicine work better than other treatments available in Ireland?
- Is the new medicine easier to give or easier to take compared with other treatments available in Ireland?
- Does the new medicine reduce the need for patients to be hospitalised?
- Does the new medicine improve the quality of a patient's life over other treatments available in Ireland?
- Will the new medicine save resources elsewhere within the health system?

We review the information from clinical trials along with the cost and value for money data presented by the pharmaceutical company. We ask doctors and other healthcare professionals for advice about any health benefits of the new medicine compared with current treatments. We also ask patient organisations to send us their views on how the new drug may improve patients' day-to-day experience of living with a disease.

What is sacituzumab govitecan used for?

Sacituzumab govitecan is a cancer medicine that is mainly used when cancers are advanced, unresectable (cannot be removed by surgery) or have spread to other parts of the body (metastatic), or when other treatments do not work. In this submission, we are considering the use of sacituzumab govitecan to treat triple-negative breast cancer (TNBC) that has spread. The place in therapy of this medicine is for patients who have already received two or more prior therapies, including at least one of them for advanced disease.

What recommendation has the NCPE made to the HSE?

We have recommended that the HSE should consider funding sacituzumab govitecan if its cost effectiveness (value for money) can be improved. The HSE will consider our recommendation and make the final decision about reimbursement (funding). When making the funding decision, the HSE will also consider the additional [criteria](#) outlined in the Health (Pricing and Supply of Medical Goods) Act 2013.

Why did we make this recommendation?

We have completed a full health technology assessment for sacituzumab govitecan. We recommend that the HSE consider providing sacituzumab govitecan if the HSE can agree a suitable price reduction with the pharmaceutical company. We believe sacituzumab govitecan may work as well or better than other ways to manage this condition. However, the price of sacituzumab govitecan is too high compared with other ways to manage this condition, and we believe that sacituzumab govitecan is not value for money.

The HSE considers a number of factors along with our recommendation when deciding whether to provide this medicine. These factors are listed in the Health (Pricing and Supply of Medical Goods) Act 2013.

Next steps

When the HSE receives our recommendation, it will look at all the relevant data about sacituzumab govitecan. The HSE makes the final decision on reimbursement.

Where can I get more information?

You can get more information about sacituzumab govitecan from the following online options:

- the NCPE Technical Summary Document
- Trodelvy® European Public Assessment Report (EPAR) – [Summary for the public](#) or [the public](#) or
- searching for sacituzumab govitecan on our website (www.ncpe.ie);
- searching for sacituzumab govitecan on the European Medicines Agency (EMA) website (www.ema.europa.eu).

Please refer to the NCPE website for updated information on the reimbursement status of this medicine.
