

NCPE Assessment

Plain English Summary

October, 2024

Drug name: Axicabtagene ciloleucel
(pronounced: AK-see-KAB-tuh-jeen syloh-LOO-sel for the treatment of adult patients with diffuse large B cell lymphoma (DLBCL) and high-grade B cell lymphoma (HGBL) that relapses within 12 months from completion of, or is refractory to, first line chemoimmunotherapy.

Brand name: Yescarta[®]

HTA ID: 22066

What is the NCPE?

The National Centre for Pharmacoeconomics (NCPE) is a team of experts who look at the health benefits and costs of medicines. The HSE asks us to advise on whether or not a new medicine is good value for money. We give unbiased advice to help the HSE provide the most effective, safe and cost-effective (value for money) treatments for patients.

How do we make our recommendations?

Our main focus is on the health benefits and cost effectiveness of a medicine. We look at the wider costs and health benefits associated with a new medicine, for example:

- Does the new medicine work better than other treatments available in Ireland?
- Is the new medicine easier to give or easier to take compared with other treatments available in Ireland?
- Does the new medicine reduce the need for patients to be hospitalised?
- Does the new medicine improve the quality of a patient's life over other treatments available in Ireland?
- Will the new medicine save resources elsewhere within the health system?

We review the information from clinical trials along with the cost and value for money data presented by the pharmaceutical company. We ask doctors and other healthcare professionals for advice about any health benefits of the new medicine compared with current treatments. We also ask patient organisations to send us their views on how the new drug may improve patients' day-to-day experience of living with a disease.

What is axicabtagene ciloleucel used for?

Axicabtagene ciloleucel is a type of advanced therapy medicine called a 'gene therapy product'. This is a type of medicine that works by delivering genetically modified white blood cells into the body. Axicabtagene ciloleucel is a medicine for treating adults whose blood cancer has returned (recurrent) or has stopped responding to previous treatment (refractory).

What recommendation has the NCPE made to the HSE?

We have recommended that the HSE should consider not funding axicabtagene ciloleucel unless cost effectiveness (value for money) can be improved. The HSE will consider our recommendation and make the final decision about reimbursement (funding). When making the funding decision, the HSE will also consider the additional [criteria](#) outlined in the Health (Pricing and Supply of Medical Goods) Act 2013.

Why did we make this recommendation?

After reviewing the data presented by the pharmaceutical company, we concluded that axicabtagene ciloleucel works as well or better than other ways to manage this condition. However, the price of axicabtagene ciloleucel is too high compared with other ways to manage this condition, and we believe that axicabtagene ciloleucel is very poor value for money. We recommend that the HSE consider not providing this medicine unless the HSE can agree a suitable price reduction with the pharmaceutical company.

The HSE considers a number of factors along with our recommendation when deciding whether to provide this medicine. These factors are listed in the Health (Pricing and Supply of Medical Goods) Act 2013.

Next steps

When the HSE receives our recommendation, it will look at all the relevant data about axicabtagene ciloleucel. The HSE makes the final decision on reimbursement.

Where can I get more information?

You can get more information about axicabtagene ciloleucel from the following online options:

- the NCPE Technical Summary Document
- Yescarta[®] European Public Assessment Report (EPAR) – [Summary for the public](#)
- searching for axicabtagene ciloleucel on our website (www.ncpe.ie);
- searching for axicabtagene ciloleucel on the European Medicines Agency (EMA)

website (www.ema.europa.eu).

Please refer to the NCPE website for updated information on the reimbursement status of this medicine
